

# Meaco COOL MC SERIES

## PORTABLE AIR CONDITIONERS

(CH MODELS CAN HEAT ROOMS)

7000BTU FOR ROOMS UP TO 22m<sup>2</sup>  
8000BTU FOR ROOMS UP TO 24m<sup>2</sup>  
9000BTU FOR ROOMS UP TO 26m<sup>2</sup>  
10000BTU FOR ROOMS UP TO 28m<sup>2</sup>

## THE MEACOCOOL FAMILY OF AIR CONDITIONERS

The MeacoCool family of portable air conditioners are designed for use in the home or the office to provide personal comfort cooling during the summer months.

The air conditioners work by drawing the warm humid air from the room over a cold surface which cools and dries the air simultaneously. The cold air is blown out of the front of the portable air conditioner whilst the warm, humid air is expelled from the space via a 1.8m long exhaust duct.

Removing the hot, humid air from the room reduces the relative humidity which means you have less of the sticky feeling that makes it hard for us to feel cool and comfortable during the summer months.

The big advantage of the MeacoCool range is its smaller, lighter and more compact size making it easier to fit within a room and to move from space to space.

The remote control allows you to change the settings without having to get up to the unit, while a window kit makes the cooling more efficient. In low fan speed the sound pressure level of 53dB(A) makes this a easier unit to live with.

To get the best out of your air conditioner we recommend pre-cooling rooms, before you need to use them, so that the room is nice and cool when you need to use it. In the case of a bedroom this

makes it easier to get a good night's sleep. You can do this more easily using the air conditioner's On Timer.

The Sleep Mode keeps the unit in low fan speed to ensure the lowest possible noise level, you can combine this with the Off Timer to ensure that you do not wake up cold during the night.

Models with the heating mode can be used in the winter months to provide warmth.

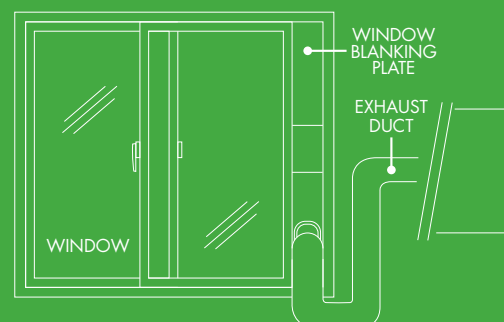

All MeacoCool air conditioners come with a two year parts and labour warranty with the option of extending this to five years if you wish.

## SPECIFICATIONS - LOWER ENERGY AND NOISE LEVEL FOR 2020
