

# Meaco DRY 50Lm-v2 DEHUMIDIFIER

# MeacoDRY 50LM-v2 DEHUMIDIFIER

Perfect for where you need a stronger dehumidifier but have to work to a budget.

The new Meaco 50Lm-v2 building dryer is a commercial dehumidifier designed for use in demanding applications where a stronger dehumidifier is required to reduce the moisture content of the air in order to reduce the relative humidity of a space and to dry either the fabric of a building or goods being stored.

The Meaco 50Lm-v2 uses a rotary compressor to increase efficiency and will extract up to

50 litres of water per day depending on the room temperature and relative humidity. This water is extracted via a water tank or continuous drainage hose.

Users of building dryers want something that is easy to set up in seconds and this is achieved thanks to the simple control panel.

The Meaco 50Lm-v2 Building Dryer can be used in a variety of applications to dry spaces out after a flood or fire, building restoration, product storage or commercial applications.

## SPECIFICATIONS

Product Name		MeacoDRY 50Lm-v2 DEHUMIDIFIER
Temperature Range	+5°C to +38°C	
Relative Humidity Range	20% - 90%rh	
Rated Voltage	230V / 50Hz	
Sound Pressure Level	<52dB(A)	
Airflow	450m <sup>3</sup> /hr	
Timer	1-24h	
Tank Size	5.5 litres	
Power Consumption at 30°C and 80%rh	650W	
Refrigerant	R290 / 230g	
Drying Capacity (L/24H)	32°C and 80%rh	50 litres per day in Continuous Mode
	26.7°C and 60%rh	28.7 litres per day in Continuous Mode
Dimensions (HWD)	892mm x 469mm x 474mm	
Nett Weight	36kgs
