PTC Down-flow 2 kW Bathroom Heater with Towel Warmer

This wall-mounted electric fan heater for bathrooms has a specially-designed air outlet for downward flowing heat and features removable towel warmer rails. It is ideal for use in bathrooms or shower rooms (subject to Section 701 of the 17th Edition of the IEE Wiring Regulations), utility areas and laundry rooms. This 2 kW Down-Flow Bathroom Heater from Premi-air features a ceramic PTC element, which is an extremely efficient heating method; it is self-regulating and varies its power to maintain a preset temperature. This means that it only draws the required current to maintain the temperature. Featuring an adjustable thermostat and two fan settings, this compact fan heater is an affordable, year-round bathroom heating solution for any home.

Features:

- PTC Heating for high thermal efficiency
- Ideal for bathrooms/shower rooms, utility areas and laundry rooms
- Space-saving design will fit into small areas
- Removable towel warmer rails
- Adjustable thermostat for comfort control

PRODUCT SPECIFICATION

Product Dimensions (mm)	520x337x192 (with towel warmer) 490x265x150 (without towel warmer)
Net weight (kg)	2
Adjustable thermostat	yes
Colour	White
Controls	Rotary
Frequency (Hz)	50
Heat settings	2
IP Rating	IPX3
Main body material	Plastic
Number in outer carton	6
Overheat safety cut out	yes
Plug Amp (A)	13
Power heat (kW)	2
Power on indicator light	yes
Protection class I or II	II
Type	UK Model
Voltage (V)	230
Wall mountable	yes

Product Code: EH1564
Barcode: 5021196716990
